WORK EXPERIENCE

Kooyman

June 2016 — June 2017

Part-time Sales Representative

I was responsible for assisting costumers at the store, organising, sorting shelve items and fulfilling orders that were made to the store.

PREVIOUS PROJECTS

Pro P

This is a project a did in my first year in order to receive my propedeuse. This project involve making:

- A website that informs users and allow them to purchase festival and camping tickets
- An Application that can be used to check visitors in and out the event and camping area
- An Application that supports the shops
- An application that allows users to deposit money which will be converted into tokens.

Web Development Projects

During my years at Fontys I worked on 3 Web Development projects that helped honed my HTML/CSS and Javascript skills. Also these projects introduced me to the Laravel and Angular frameworks. These projects were never host published only hosted temperarly on the schools server.

ProCP

This is a project I am currently doing at this point in time and is set to be delivered in January 2020. This project involves making a simulation application that simulates the movements of people at the city hall.

EDUCATION

ICT- Software Engineering

September 2017 — Present

Fontys University of Applied Science

I am a 2nd year Software Engineering who specialised in ethical hacking and iOS app development.
